

FrontEnd Developer

Joan Guinart Casas

As a Frontend Developer, I focus on detail, performance, and smooth, well-crafted interactions. With 3+ years of experience, I've worked on many types of projects and feel especially comfortable with Next.js. I'm a natural problem-solver – I take ownership of my work and look for practical, high-quality solutions without losing precision. In a team, I adapt to what the project needs while keeping a sustainable and healthy workflow. I value clean code, thoughtful decisions, and creating user experiences that not only work, but feel genuinely good to use.

Info.net
Frontend Developer
- Nov 2022 – Oct 2023  Barcelona
Front & Conde
Frontend Developer
- Aug 2021 – Mar 2022  Barcelona
Vueling
Aircraft maintenance engineer

As a Frontend Developer at Ara newspaper in Catalonia, I developed most of the institution-focused websites for clients such as city councils and the Generalitat. I worked with technologies including Astro, React, Next.js, PHP, CSS/SCSS, Tailwind, and GSAP to create fast, dynamic, and highly interactive user experiences. I collaborated closely with the frontend lead to ensure consistency, high code quality, and modern development practices across projects.

Primary Frontend Developer responsible for implementing Figma designs into Twig templates using Bootstrap and CSS, adding interactive JS features, and improving UI/UX consistency. Collaborated with a 10+ person team using GitLab for development and version control.

Developed modern, high-performance web applications for major European clients using Vue 3, Nuxt 3, and Tailwind. Designed responsive, polished user interfaces and contributed to robust frontend architecture.

Independently managed full project lifecycles – from requirements and client communication to delivery – ensuring clarity, alignment, and consistently high satisfaction.

Exceled in a fully remote environment, collaborating effectively with cross-functional teams, meeting tight deadlines, and maintaining a strong focus on quality and reliability.

Proficient in maintenance of aircraft with turbine engines, including inspection, diagnosis, and repair of airframe, engines, hydraulics, electrical systems, and avionics.

Extensive experience in working with turbine engines on aircraft, ensuring their efficient functioning and optimal performance.
